Here is what sort-of happens for the code

```
<seq>
  ...
  <video begin="3s"/>
  ...
</seq>
```

For good measure, we also pause the presentation half way through the video

grandparent   <seq>   <video>

Implement begin/end/ dur/repeat/etc

Implement begin/end/ dur/repeat/etc

activate   *listen to events*   activate   *listen to events*

done   done   *Drive media playback*

SMIL Scheduler Core layer

Implement <seq> semantics for children

start_play   pause   resume

started   paused   stopped

SMIL Side Effects layer

Control video playback
