June 8, 2005
London (via Teleconference)

6/15/2005   **http://www.NITF.org**   1

Agenda

- Minutes from San Diego

- NITF 3.3
  - Presentation
  - Vote

- Action Items / Open Forum

6/15/2005   2

NITF 3.3 Adjustments

- **Two small additions: both fully backwards compatible**

  - Changed content model for dd to include enriched-text

  - Added data-location attribute back in for media-reference element (had been removed with NITF 3.0)

- **Both these additions were fully presented and discussed in San Diego**

6/15/2005   3

Clean Up <dd>

- **NITF 3.2 (also allowed in NITF 3.3):**
  `<dl>`
  `<dt>Name</dt>`
  `<dd><p>Brian Laudrup</p></dd>`
  `</dl>`

- **NITF 3.3:**
  `<dl>`
  `<dt>Name</dt>`
  `<dd>Brian Laudrup</dd>`
  `</dl>`

6/15/2005   4

---

dd's DTD demo

- **NITF 3.2:**
  - `<!ELEMENT dd (block | %block.content;)*>`

- **NITF 3.3:**
  - `<!ELEMENT dd (block | %block.content; | %enriched-text;)*>`

6/15/2005   5

Add Back data-location

- NITF 2.5 had two attributes of <media-reference> to stand for the address / ID / URL of an externally-stored media object (a photo or video clip, for example):
  - source
  - data-location

- NITF 3.0 took data-location out (October, 2001)

- NITF 3.3 puts data-location (optionally) back in

6/15/2005   6

NITF 3.3 Schema Draft

- Left to do:
  - Transfer documentation over
  - Migrate hard-wired controlled vocabularies out of Core XSD and into Schema Resource Files
  - Debug a few trouble-spots

Action Items / Next Meeting

- Vote on NITF 3.3 in Standards Committee

- Release New Build of DTD & Documentation

- Finish the Schema Draft

- Next Meeting: Milan, October '05

- Open Forum
